From the Editor's Desk.....

The present age is the era of Science. Today, human civilization stands on the stage of development where man has reached the moon, landed his Mars craft on Mars, preparing to land on the Sun, discovered some alternative sources of energy and continuing the search for other alternative sources, by taking the land, water and space into its grasp created a means of rapid transportation and fast information communication technologies. By developing dangerous nuclear weapons human is also fighting with creation and destruction. Through the Internet, the whole world has crossed the threshold of physical boundaries and become a global village. Physical distances have become insignificant in today's scenario. But in this story of the development of human civilization, the struggle and life expectancy of human has played very important role. He has beautified the courtyard of the world with his creations, giving realization to his creativity and imagination.

The glorious form of the world that is present before us today is the result of the same talent, ability, courage and workability of human. But in this grand story of the development of human civilization, many obstacles also came from time to time which tried to stop the wheel of the development journey of humans. These obstacles sometimes came to us in the form of natural disasters, sometimes in the form of disease and pestilence, sometimes in the form of wars as a result of the personal selfishness and greed of humans, which had to suffer the consequences of all mankind. In these disruptions of human development journey, diseases and

Challenges Faced by Teachers of Higher Education During COVID-19

Dr. Dattatraya Tambe

Abstract

This paper explores various strategies for creating engaging online learning environments. It describes a framework which identifies and distinguishes between the critical elements needed in the design of online learning. Provides perspectives on the theory, development, and application of innovations in teaching and learning. Authors share ideas, training to manage online courses case studies, feedback-based learning, online learning, computer assisted assessment, screencast technology, and original research on pilot projects, opportunities, emerging technologies, and other innovations in teaching and learning. This text presents major terms in educational focusing on original methodologies and models & promotes technology-based learning processes.

Keywords: *Changes of education, Challenges & Issue, Problems & Suggestion etc.*

Intoduction

Online teaching & learning is one of the main components in educational planning which is a key factor in conducting educational plans. Despite the importance of good teaching, the outcomes are far from ideal. Since the corona virus outbreak, online classes
