### Abstract

Indian educational system is one of the most of education systems; two thousand years ago man lived in cave than the time of traditional education system. Since independence we are facing challenges to establish a good and strong education system. Various governments tried to establish new and effective education policies in the system but they were not sufficient for our country. Still Indians are facing lot of problems in our Education System. Indian government recognizes that the new global scenario poses unrivalled challenges for the higher education system. In this year starting from the spring of 2020, the outbreak of the Covid-19 caused Chinese universities to close the campuses and forced them to initiate online teaching. Online teaching & learning is one of the main components in educational planning which is a key factor in conducting educational plans. While most universities, colleges or other educational institutions have made the complete transition to online teaching, teachers are still struggling with ways to engage students online. Online learning provides opportunities for higher education to deliver services for people continuing their education, to leverage technology to reduce burden on teachers and to use improved pedagogies better suited to maintaining student engagement.

**Key words:** Concepts of Covid-19, Implications of Higher Education, Issue, Effect, Challenges & Remedies etc.
